

## BUFFET TABLES - CARE INSTRUCTIONS

Craster's products are made to be used every day and on every occasion. This is why they deserve some simple, caring actions to preserve their quality over time

These tables have been produced to the highest standard to guarantee you the utmost durability in quality and long lasting life, however they have a natural give in them that can be slightly more pronounced with our range of tall wooden legs

**DO NOT :** To preserve the quality of these tables please do not use them as working tables or for general work purposes.

### **SUGGESTED ITEM :** Adjustable feet

We recommend adjustable feet be purchased in combination with any of our legs for any tables that will be placed on carpet to minimize movement. Tables that are not placed on a fully flat surface have a tendency to give very slightly over time, therefore we advise to consider the adjustable feet as an alternative if you intend on a carpeted display.

## BUFFET TABLES - CARE INSTRUCTIONS

### HPL

- To clean wipe with a damp cloth
- Do not clean with abrasive cleaners or scouring pads
- Clean spillages with neutral detergent diluted in warm water
- Never use sharp objects such as knives directly on the surface of HPL
- Use a protective pad underneath hot objects or ovenware

### WOODEN

- To clean wipe with a damp cloth
- Strongly coloured liquids such as coffee, tea or red wine should be wiped up immediately
- Do not clean with abrasive cleaners or scouring pads
- Do not use strong cleaning agents
- Avoid exposure to standing water
- Use a protective pad underneath hot objects or ovenware
- Avoid exposing the wooden furniture to excessive heat or direct sunlight as this can cause cracking and deterioration of the colour
- Never use sharp objects such as knives directly on wood surface

### GLASS

- To clean use glass cleaner and a clean cloth
- Do not clean with abrasive cleaners or scouring pads
- Clean spillages with neutral detergent diluted in warm water

### OAK TABLE LEGS

- To clean wipe with a damp cloth
- Use 4mm Allen Key to tighten screws on legs, when deemed necessary

### STAINLESS TABLE LEGS

- Clean with stainless steel cleaner and a clean cloth
- Wipe in the direction of the grain
- We recommend 3M Stainless Steel Cleaner and Polish

### MATT BLACK, MILD STEEL LEGS
