

TILT BLACK GLASS BOWLS CARE INSTRUCTIONS

Glass is a hard substance, but it can be scratched. Glass is resistant to many, but not all, chemicals. One of the most harmful materials to glass is glass itself. When glass is stored it should be separated by a suitable separator.

CLEANING

- METHOD ONE

Use a soft cloth with proprietary glass cleaning solutions, ensuring you follow all printed instructions. Immediately remove cleaning solutions with a clean, soft, dry cloth to avoid smearing

- METHOD TWO

Use a soft cloth with 50-50 mixture of alcohol and water, or ammonia and water, followed by a warm water rinse.

Immediately dry with a clean, soft, dry cloth to avoid smearing

DO NOT

- DO NOT use abrasive or highly alkaline cleaners, or petroleum products (i.e. petrol, diesel or lighter fluid)
- DO NOT use acidic products as these are corrosive to the glass surface (i.e. Hydrofluoric or phosphoric acid)
- DO NOT use abrasive cloths, brushes, or sharp objects
